Montaña, Tanauan City, Batangas

## PROFILE

Computer Science graduating student majoring in Machine Learning at National University – Lipa, with strong foundations in mathematics, deep learning, and computer vision. Experienced in CNN-based image classification, predictive modeling, and Natural Language Processing (NLP). Proficient in TensorFlow and Keras for deep learning model development, with hands-on experience in data preprocessing, evaluation, and system integration.

## EDUCATION

**National University – Lipa | BS Computer Science Major in Machine Learning** *2022 – 2026*

- *Relevant Coursework: Machine Learning, Artificial Intelligence, Deep Learning, Computer Vision, Natural Language Processing, Mathematical Analysis, Discrete Structures*

## PROJECTS

**NPK Deficiency Detection in Ampalaya Leaves | CNN Image Classification**

- Collected and organized leaf image datasets for NPK deficiency classification
- Performed image preprocessing and augmentation using Jupyter Notebooks
- Developed and trained CNN models using TensorFlow and Keras
- Evaluated model performance using accuracy, precision, recall, and confusion matrix
- Analyzed experimental results to improve model performance

**Kapeng Barako Tree Identification System | CNN Classification & Front-End Integration**

- Developed CNN-based image classification models using TensorFlow & Keras to classify Liberica vs. non-Liberica
- Trained and evaluated the models' performance using accuracy, precision, recall, and confusion matrix
- Assisted in image data gathering and dataset preparation for model training
- Contributed to front-end development of the classification system using Tailwind CSS
- Integrated the system with a MySQL database to support application functionality

**Smart Admission System | Predictive Modeling & Front-End Integration**

- Cleaned and prepared structured datasets for model training and evaluation
- Performed feature engineering to improve data quality and predictive performance
- Trained and evaluated models to estimate the probability of student enrollment
- Assisted in front-end development using CSS
- Connected and managed the system's MySQL database for data storage and retrieval

## ACHIEVEMENTS

**First Honors Dean's Lister** *2022 - Present*

*National University – Lipa*

- Consistently awarded First Honors from 1st Year to 4th Year for outstanding academic performance.

**Vice President** *2024-2025*

*Community of Developers and Experts in Computer Science*

- Led planning and coordination of academic and technical activities.

**Secretary** *2023-2024*

*Community of Developers and Experts in Computer Science*

- Managed official documentation, meeting minutes, and internal communications.

**Social Media Manager** *2022-2023*

*Community of Developers and Experts in Computer Science*

- Managed and created content for the organization's social media platforms.

## TECHNICAL SKILLS

- **Machine Learning:** CNN-based Image Classification, Predictive Modeling, Natural Language Processing (NLP), Model Training & Evaluation, Feature Engineering
- **Framework & Libraries:** TensorFlow, Keras, NumPy, Pandas
- **Mathematics & Statistics:** probability, linear algebra, analytical problem solving
- **Tools & Platforms:** Jupyter Notebooks, XAMPP, RapidMiner, MySQL, Tailwind CSS / CSS, Canva, Figma, Microsoft Office 365

## CERTIFICATION

IC3 Digital Literacy | Certiport *August 2024*
IT Specialist in Artificial Intelligence | Certiport *March 2025*
English Certificate (C2 Proficient) | EF SET *February 2026*
Intro to Data Science | Cisco Networking Academy *February 2026*
